(B) A controlled substance in Schedule V may be dispensed by a pharmacist without a prescription to a purchaser at retail provided that:

- (1) The compound, mixture or preparation containing the controlled substance is not a prescription drug and,
- (2) The compound, mixture, or preparation contains not more than 100 milligrams of opium per 100 milliliters or per 100 grams.

(C) Substances Excepted from Schedule V are subject to the following conditions:

- (1) That such preparation shall be dispensed or sold in good faith as a medicine and not for the purpose of evading the provisions of the controlled substance law; and
- (2) That the purchaser of such preparation identify himself to the satisfaction of the pharmacist; and
- (3) That no more than four ounces of such preparation are dispensed or sold to a person during any 48 hour period, and
- (4) That the pharmacist dispensing such excepted substances shall keep an accurate record book including the name and address of the purchaser, the name of the preparation, the strength per dosage unit, the quantity dispensed and the date.

701.003: Emergency Situations in Which Controlled Substances in Schedule II May Be Dispensed upon Oral Prescription

(A) "Emergency situations", for the purpose of permitting the dispensing of any controlled substance in Schedule II upon oral prescription, means those situations in which the practitioner who proposes to prescribe a controlled substance in Schedule II determines:

- (1) That the immediate administration of the controlled substance is necessary for proper treatment of the intended ultimate user, and
- (2) That no appropriate alternative treatment is available, including administration of a controlled substance which is not in Schedule II, and
- (3) That it is not reasonably possible for the practitioner to provide a written prescription to be presented to the person dispensing the controlled substance prior to the dispensing.

(B) In case of an emergency situation as defined above, a pharmacist may dispense a controlled substance in Schedule II upon receiving oral authorization of a prescribing individual practitioner; provided that:

- (1) The quantity prescribed and dispensed is limited to the amount adequate to treat the patient during the emergency period; and
- (2) The prescription is immediately reduced to writing by the pharmacist and contains all information required in M.G.L. c. 94C, § 20(a), except for the signature of the prescribing individual practitioner; and
- (3) If the prescribing individual practitioner is not known to the pharmacist, he makes reasonable good faith effort to determine that the oral authorization came from a registered individual practitioner, including a callback to the prescribing individual practitioner using his phone number listed in the telephone directory or other good faith efforts to insure his identity.

(C) Within 72 hours after authorizing an emergency oral prescription, the prescribing individual practitioner shall cause a written prescription for the emergency quantity prescribed to be delivered to the dispensing pharmacist. In addition to conforming to the requirements of M.G.L. c. 94C, § 20(a), the prescription shall have written on its face "Authorization for Emergency Dispensing". The written prescription may be delivered to the pharmacist in person or by mail, but if delivered by mail it must be postmarked within the 72-hour period.
